Welcome to my React Markdown Previewer!

This is a sub-heading...

And here's some other cool stuff:

Heres some code, `<div></div>`, between 2 backticks.

```
// this is multi-line code:

function anotherExample(firstLine, lastLine) {

  if (firstLine == '```' && lastLine == '```') {

    return multiLineCode;

  }

}
```

You can also make text **bold**... whoa!

Or _italic_.

Or... wait for it... **_both!_**

And feel free to go crazy ~~crossing stuff out~~.

There's also [links](https://www.freecodecamp.org), and

> Block Quotes!

And if you want to get really crazy, even tables:

Wild Header | Crazy Header | Another Header?

------------ | ------------- | -------------

Your content can | be here, and it | can be here....

And here. | Okay. | I think we get it.

- And of course there are lists.

  - Some are bulleted.

    - With different indentation levels.

      - That look like this.

1. And there are numbered lists too.

1. Use just 1s if you want!

1. And last but not least, let's not forget embedded images:
